OPSITE Post-Op Visible, a difference you can see

No hidden problems
The new OPSITE Post-Op Visible dressing, with its unique lattice structure foam pad and transparent top film, has been specifically designed to give you the ability carry out regular assessments of the wound without the need to lift or remove the dressing. This allows you to react early to signs that could potentially delay the healing process.

Just great results
Every feature of OPSITE Post-Op Visible provides tangible benefits and is designed with your patients' well being, comfort and recovery in mind. The dressing creates an optimum environment for healing by controlling moisture balance, absorbing wound discharge and preventing the build up of fluid under the dressing. This minimises both the potential for maceration and the number of dressing changes needed. Encouraging healing and reducing the chance of infection can lead to shorter recovery times and lower treatment costs.

Bacterial barrier
Provides a barrier against bacteria, including MRSA, to reduce the risk of infection

Lattice foam structure
Allows you to monitor progress of the wound as often as you like without unnecessary dressing changes for your patients. This reduces disturbance to the wound bed, minimises the risk of infection and helps to provide a cost effective solution

Comfortable and conformable
The unique dressing design and low-allergy adhesive ensure it's comfortable to wear and easy to apply and remove

Waterproof film
Patient can shower with dressing in situ

High Moisture Vapour Transmission Rate (MVTR)
The film has a unique molecular structure which gives a high MVTR. This allows unwanted moisture to transpire and helps prevent infection

Highly absorbent lattice pad
Allows lateral spread across the lattice pad to maximize absorbency without impairing visibility, reducing the risk of skin maceration and minimising the number of dressing changes for cost effective care

Ordering information
OPSITE Post-Op Visible is designed for low to moderate exuding post-operative wounds, lacerations, cuts, abrasions and minor burns.
Each OPSITE Post-Op Visible dressing is individually wrapped and sterile.

With OPSITE Post-Op Visible there are no hidden problems - just great results
